Education

PRESENT   ANTSIRABE, MADAGASCAR

Informatique | Bacc+2
University FJKM Ravelojaona

- Developed a comprehensive understanding of programming languages, which enabled me to create efficient and scalable software solutions for various projects.
- Completed hands-on projects in database management, helping me gain practical skills in SQL and data analysis, which are essential for effective data handling.
- Collaborated on group assignments focused on software development methodologies, which improved my teamwork abilities and taught me how to adapt to different project requirements.
- Conducted research on emerging technologies, helping to expand my knowledge of industry trends and best practices, which I later applied to enhance project outcomes.
